**RE: ISB Base Coving**

**IARC # 07-2**

Dear Mr. Harrison:

Thank you for submitting information regarding your Integral Slant Base (ISB) floor-to-wall coving to the Inter-Agency Review Council (IARC) for review. The purpose of the Council is to review products and processes for use in food establishments in Minnesota.

After your presentation at the IARC on September 17, 2007, the Council determined that the **ISB is acceptable** and consistent with the requirements of the Minnesota Food Code.

This recommendation of allowing your base coving in establishments will be forwarded to the Minnesota Departments of Health and Agriculture and local health agencies. Although most agencies agree to IARC guidance, please be reminded that local health agencies may enforce rules or regulations that are more stringent than those contained in the Food Code and they are not bound by any IARC decisions.

If you have questions, please call me at 218-308-2113.

Sincerely,

Dave Kaufman, R.S., Chairperson  
Inter-Agency Review Council
